INSAF MALAYSIA ORGANIZATION CHART

LOGO'S RATIONALE

Heart

The heart symbolises peace as well as INSAF's empathy and care.

Black

The colour black focuses on the state of the victims of natural disasters who are groping in the dark, facing adversity and in need of assistance.

Red

The colour red represents the joy and relief felt by the victims who receive help. At the same time, it represents hope for the lives of these victims to be rebuilt and for them to embrace life once again.

ABOUT US

The organization took a while to come together but finally in June 2011, with the help of some very dedicated people it was registered with the Register of Society and it is now ready to spring into action

INSAF can be translated in English as Awareness/Consciousness. Mr Ishak thought of the name after his involvement in various disaster relief missions, to Aceh in January 2005, to Pulau Nias in April of the same year, to Bagh, Pakistan in October 2005 to Jogjakarta in 2006, Sichuan & Gangsu Province, China 2008 and Padang Sumatera Barat, Indonesia 2009.

Other members of the committee were also involved in various rescue operations during the Tsunami/Eartquake crises and the others disasters which stuck South-East Asia in 2005/ 2009. Dr Alvin (Aceh, Pakistan) and Dr Syawal (Aceh, Pulau Nias) Aziz Radin (Pakistan & Padang Sumatera), Dr. Abdul Malik Abdul Gaffor (Aceh, Pakistan, Jogjakarta, Padang Sumatera), Dr. Rodzila Rodi (Padang Sumatera) were volunteers with various Disaster Relief Organizations.

OUR VISION AND MISSION

Our vision is to strive, through voluntary action for a just world, where help is delivered with dignity, respect and concern for all without discrimination as to nationality, race, religion, class or political affiliations.

Our mission is to help improve the lives of vulnerable people the world over. People who are at risk because of war, natural disasters, socio-economic crises or health emergencies.

Our additional aim is to promote humanitarian values, disaster response, disaster preparedness and health care in the communities most at risk.

Our Clusters

Health

In a disaster response health emergencies will represent the largest part of our work. Providing first aid and all the basics services related to health emergency the medical teams need to be fast, efficient and capable of working under pressure. Mobile clinics will also have a crucial role in reaching rural folks or communities cut off by flood, earthquake or other natural disasters.

In the long run the teams will, in addition, will be able to assess the appropriate long-term rehabilitation work needed, either physical or psychological. They will also aim to help in educating the various communities in health issues and community care.

Shelter

Very often in the aftermath of a disaster the victims are homeless or displaced and the need for a dry shelter is as important as the need for food. Tents are the main choice of shelter at the initial stage but they are a temporary solution to a very big problem. Therefore in the long run INSAF's team can help in working out more permanent accommodations and even help with the rebuilding of houses

FOOD

PROGRAMME

Food

INSAF's team comprising doctors and nutritionists will assess what type of food is required following an emergency depending on the type and location of the disaster. The food supplied needs to fit in with the various religious beliefs of the victims and the type of diet they are accustomed to consume.

The team will also assess the particular needs of the elderly and the children because these two groups are often vulnerable to nutritional deficiencies.

WASH
 WATER
 SANITATION
 HYGIENE

Water and Sanitation

In any emergency, lives are put at risk by inadequate water supplies and poor sanitation. INSAF's aim is to help provide some water supplies, and essential sanitation facilities, even in the most difficult circumstances.

In emergencies which unfold over a longer period of time, there is more time to develop solutions that are more cost-effective and appropriate to local conditions.

INSAF health teams also work alongside water engineers to ensure water and sanitation facilities are used properly to prevent the spread of disease.

CAN ANYONE VOLUNTEER?

All Malaysians aged 18 and above who are willing to help and who share our organisation's visions, mission and objectives.

Anyone can apply including employees of private sector, government servants, businessmen and retirees, regardless of race, religion or gender.
